

## Quarzo-Resina SM QUARTZ

Rivenditori autorizzati

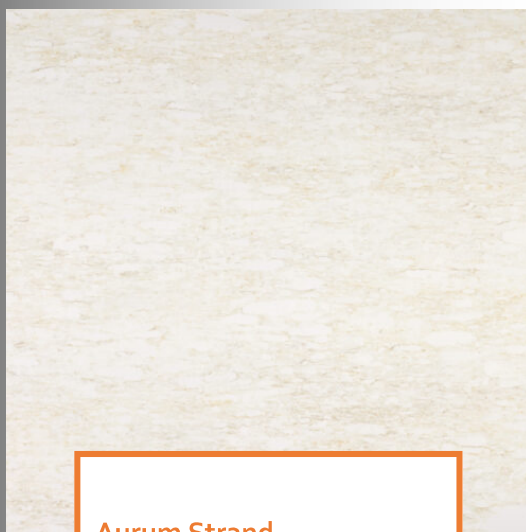

Creati a partire da sabbie di quarzo e resine accuratamente selezionate che subiscono un intenso processo di lavorazione, calibratura e lucidatura, i materiali SM Quartz sono in linea con i rigidi standard internazionali richiesti per l'industria del cibo e per l'uso all'interno degli ambienti domestici. SM Quartz è ideale per diverse applicazioni, dai grandi e prestigiosi spazi commerciali, agli spazi più intimi di cucine, bagni, pavimenti e molto altro.

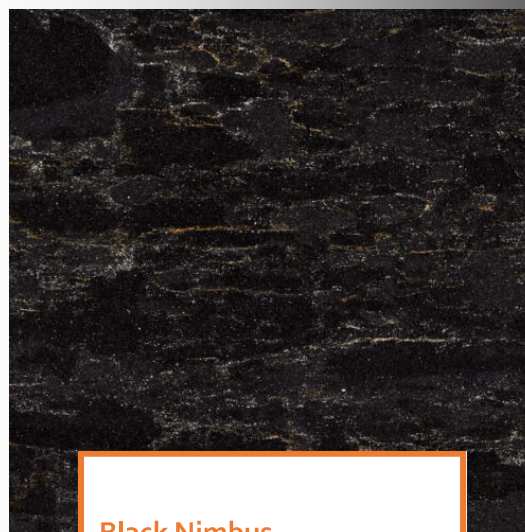

## Resistente ai graffi, alle macchie ed al calore

I piani in SM Quartz sono caratterizzati da alta resistenza ai graffi, basso livello di assorbimento dell'acqua e alta resistenza agli agenti chimici. Gli alimenti non lasceranno alcuna macchia sul piano. Se confrontata con altre superfici in quarzo, la lucidatura delle superfici Santamargherita non ha eguali: il materiale è resistente alle macchie e non trattiene lo sporco, rendendo il piano molto facile da pulire. Le superfici lucide in quarzo sono non porose e altamente resistenti a liquidi e sostanze acide come caffè, vino, succo di limone, olio d'oliva, aceto e cosmetici. Consulta l'apposito manuale per avere maggiori informazioni sulla cura & manutenzione delle superfici SM Quartz.
